Bedlington Covid19 Aid and Isolation Support - Group Information 2020

With the recent global pandemic of Covid-19 there is a worry for many of us in Bedlington and across the globe about how we will cope during this time. This group has been set up to assist those in need during this period.

Our group has been built with key members in the local community who have bound together to set up a robust support network for the Bedlington community.

We openly encourage people to make enquiries if they need help or know someone who does, you can do this by visiting our website using this link - bedlington-network.co.uk

We currently have volunteers working every day to support people in this community and by working together we will get through this pandemic.
